👤 ABOUT

I am currently in my third year of master's degree in computer science at Beihang University. I am broadly interested in solving real-world visual understanding problems with optimization/learning-based algorithms. Recently, I am interested in developing learning and optimization frameworks for **visual saliency analysis** (especially salient object detection) and **urban scene parsing** (especially semantic segmentation).

👥 EXPERIENCE

Peng Cheng Laboratory (PCL), Shenzhen, China Dec. 2018 – Mar. 2019

Assistant Researcher

Engaged in the basic research work of computer vision, mainly focused on salient object detection. During this period, a remarkable salient object detection algorithm focusing on errors was proposed, and its performance obviously exceeded the existing methods.
